

Capacitor Anwendung

```
graph TD; subgraph "Capacitor Anwendung"; direction TB; A[Capacitor Anwendung]; end; subgraph "Capacitor-BrowserView Plugin"; direction TB; B[Plugin API]; C[Android Implementierung]; D[iOS Implementierung]; E[Electron Implementierung  
(Windows, Linux, macOS)]; B --- C; B --- D; B --- E; C --- F[WebView]; D --- F; E --- F; end; A <--> B; F <--> C; F <--> D; F <--> E;
```

The diagram illustrates the Capacitor architecture. At the top is the 'Capacitor Anwendung' (Capacitor Application) layer, which is a white box with a black border. Below it is the 'Capacitor-BrowserView Plugin' layer, a light purple box. Inside this plugin layer is the 'Plugin API' (a blue box) and three native implementation boxes: 'Android Implementierung', 'iOS Implementierung', and 'Electron Implementierung (Windows, Linux, macOS)'. All these are blue boxes. At the bottom is the 'WebView' layer, a red hatched box. Bidirectional arrows connect the application to the plugin API, and each native implementation to the WebView.

Capacitor-BrowserView Plugin

Plugin API
