

The diagram illustrates the architecture of a Capacitor application, showing three distinct layers stacked vertically. The top layer is a white rectangle with a black border, labeled 'Capacitor Anwendung', set against a light orange background. The middle layer is a large rectangle with a purple border and diagonal hatching, labeled 'Capacitor-BrowserView Plugin'. The bottom layer is a rectangle with a red border and diagonal hatching, labeled 'WebView'. Double-headed vertical arrows connect the top layer to the middle layer, and the middle layer to the bottom layer, indicating bidirectional communication between them.

Capacitor Anwendung

**Capacitor-BrowserView
Plugin**

WebView
